Art XP

## ABOUT ARTXP

## WHERE ARE WE

## THE MISSION

*ArtXP* is a business that was started by streamers for streamers. Gaming is a hobby that has risen from being a waste of time to a way to help people with their mental issues, make money, or just to have fun. Meeting new people leads to creating a community. Our graphic designers want to help streamers by creating custom banners and logos for their pages including youtube and twitch.

*ArtXP* is located in San Luis Obispo, California but we help anyone worldwide. We have about 20 Graphic Designers working for us that are all involved in gaming. We also have UX designers and researchers to personally help our customers.

*ArtXP*'s mission is to connect streamers and build relationships with our customers so that we create art that they, as well as their community, loves. We have profiles of each of our designers along with examples of their works so that consumers can view and choose the one they appeal to the most. All that is needed is an account and once that is set up, you can message a designer to get a quote.
